Skills

- **Cloud & Infrastructure:** Kubernetes, AKS, OpenShift, Docker, GitOps, Argo CD, Kyverno, CI/CD, Infra Automation
- **Programming:** Go, Python, Java, C++, JavaScript, Bash, React, Node.js, MongoDB, Linux
- **DevOps & Platforms:** GitHub Actions, Jenkins, GitHub, Git, Kubernetes Operators, REST APIs, Jira
- **Engineering:** Cloud Architecture, Platform Engineering, System Design, Debugging, Reliability, Full-Stack Development

Education

Bachelor of Engineering (Honours), Software Engineering (CGPA: 3.99/4.3)

May 2027 (Expected)

Ontario Tech University, Oshawa, ON.

Diploma in Graphics Design and Information Technology

March 2021

G-Tec Education, India

Work Experience / Internship

Software Developer EILemuel

September 2026 - Present

- Re-architecting EILemuel's Wix-based website into a fully self-hosted full-stack platform, replacing the existing no-code environment with custom application, hosting, and deployment infrastructure.
- Designing a low-cost cold-standby disaster recovery architecture on AKS using containerized workloads, automated deployment, backups, and failover procedures to provide a secondary recovery path.
- Developing a complete online donation system with frontend workflows, backend processing, validation, integrations, and supporting application services.
- Engineering 2 digital platforms across EILemuel and ReThread Living, including the primary production platform and a dedicated digital magazine.

Cloud Developer Intern Royal Bank of Canada

January 2026 - August 2026

- Developed multi-cloud Kubernetes platform capabilities across 3 environments: AKS, EKS, and OpenShift, using Go, Kyverno, GitOps, and operator-based automation.
- Built automation supporting the migration of 1,000+ repositories from on-premises GitHub to GitHub Enterprise Cloud, contributing to an approximately 80% reduction in workload on the on-premises GitHub environment.
- Modernized CI/CD processes by migrating Jenkins-based workflows to GitHub Actions, developing reusable automation for deployment, testing, validation, and platform operations.
- Contributed to Kubernetes CPU and memory rightsizing initiatives projected to reduce infrastructure and licensing costs by over \$1M.

Open Education Resource Content Manage Ontario Tech University

January 2025 – December 2025

- Developed and contributed to 50+ interactive learning activities and digital resources using H5P, Pressbooks, and 3D content tools for university courses.
- Transformed complex academic and technical concepts into clear, interactive, and accessible digital learning experiences.
- Collaborated with faculty while ensuring content met university accessibility, usability, and technical publishing

Software Developer Intern EmpowHer Initiatives Inc.

June 2024 – August 2024

- Developed a React Native mobile application spanning user-facing functionality and backend integration as part of a team building an MVP for a community-focused women empowerment initiative.
- Helped fast-track MVP development within a short period by learning unfamiliar technologies alongside the team lead, rapidly implementing features, and adapting to evolving requirements.
- Applied UI/UX principles and iterative testing while supporting secure data handling, debugging.

STEM Instructor Mathstronauts

April 2025 — July 2025

- Taught Scratch coding to students in grades 6–8, introducing basic programming skills through hands-on projects.
- Supported STEM learning by creating a fun and engaging environment as part of the STEAM Engine initiative.

Communication Assistant Ontario Tech University

May 2024 — August 2024

- Updated and maintained Ontario Tech Engineering Faculty webpages using CMS Cascade, redesigned page layouts.
- Managed project workflow using Jira, leveraging the platform to track and organize tasks, and maintain deadlines.

Projects

AvidReader - AI-Assisted Reading Dashboard (Capstone Project)

Sept 2026 - Present

- Developing an LLM-powered reading platform using grounded document retrieval and AI-assisted interactions including Q&A, summaries, literary exploration, and concept visualization.

niya - Hospital Management System (Mobile app/Admin Website)

January 2026 - Present

- Designing a multi-interface hospital management system for patients and healthcare staff, incorporating AI-assisted workflows for appointment management, patient flow, and clinical interactions.
